Quantitative C-reactive protein (CRP, test code: CRP) assays aid in the detection and evaluation of inflammatory disorders and associated diseases, infection, and tissue injury in adults. Highly sensitive C-reactive protein (hs-CRP, test code: HCRP) assays aid in the assessment of the risk of future coronary heart disease.

Clinical Labs of Hawaii utilizes the Roche Particle-enhanced immunoturbidimetric assay (PETIA) for both CRP and hs-CRP measurements. The assays are FDA approved for their specific indication.

The measuring range of the CRP assay is 0.3 - 350 mg/L. Because of the increased sensitivity of this assay, a separate pediatric CRP (test code: CRPT) is no longer necessary and will be discontinued.

Test Options:

Test Code	Test Name	Ref Range	CPT Code	Sites
CRP (0472)	CRP (All ages)	<5.0 mg/L	86140	All CLH hospital sites
HCRP (1666)	CRP (Cardiac Risk)	<p>Normal: <1.00 mg/L</p> <p>Low risk: <1.00</p> <p>Average risk: 1.00-3.00</p> <p>High risk: >3.00</p> <p>Results >10 should be evaluated for other non-cardiovascular origins</p>	86141 (Requires Advanced Financial Responsibility form for HMSA subscribers)	Heights Core Lab (Oahu)

Thank you for choosing Clinical Labs of Hawaii.
