

**MEMO:                   CANCER ANTIGEN 27-29**

Date:                   June 18, 2018

Dear Provider:

Due to test discontinuation of Cancer Antigen 27-29 (CA 27-29) testing at our current vendor, Clinical Labs of Hawaii will refer testing to ARUP Laboratories.

Methodology remains the same (Quantitative Electrochemiluminescent Immunoassay), however, CA 27-29 results should be closely monitored as there are slight variances in reference ranges and possible baselines:

Test	Old Range	New Range
Cancer Antigen 27-29	1 – 37 U/mL	0 – 40.0 U/mL

If you have any questions or would like to consult with a pathologist, please contact our Client Services Department:

808.677.7998.....Oahu  
866.281.6816.....Neighbor Islands

Sincerely,  
Clinical Labs of Hawaii
